DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the closest prior art of record, i.e. U.K. Patent Application No.2184859A (Georgiou et. al.) teaches (Figs.1-11) an optical fiber device that can be used as an attenuator or a sensor including a bi-conical taper 2 which is surrounded by a temperature sensitive medium in which the medium alters its refractive index in response to a change in temperature which uses at least two wavelengths (λ_1 and λ_2) in which changes in these wavelengths can be detected at detectors D1,D2. Georgiou et. al. does not teach or suggest the claimed invention which includes: an attenuator for attenuating optical energy at a first wavelength, a portion of the fiber through which both a first and second wavelength are transmitted with the fiber having a side surface through which at least some of the optical energy at the first wavelength can be controllably extracted, a controllable material formed on the side surface of the fiber wherein the controllable material controllably extracts the optical energy at the first wavelength according to a changeable stimulus applied thereto; and a light source in operable contact with the controllable material for applying the changeable stimulus thereto; wherein the changeable stimulus comprises light energy at the second wavelength and wherein the temperature of at least some of the controllable material residing adjacent the side surface of the fiber is raised as the light energy at the second wavelength is absorbed by the controllable material. These limitations are recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian M. Healy whose telephone number is (571)272-2347. The examiner can normally be reached on M-Thurs 7-4PM.
